Software Engineer or Full Stack Engineer

Goal-oriented and dependable AI Software Engineer in training at TripleTen, blending a Master of Education with an extensive background in full-scale HR management and postsecondary student support. Driven by a strong work ethic and a passion for continuous learning, I excel at translating years of organizational problem-solving into clean, efficient code. My mission is to bridge my experience in talent management and instructional frameworks with technology, building and maintaining innovative software applications that empower individuals, support their personal growth, and drive mission-driven teams forward.

Technical Skills

Google Workspace | PeopleSoft | NeoGov | Kronos | Microsoft 360 | HTML | CSS | JavaScript | Node.js | Express | Python
REST APIs | MongoDB | Git | Docker | GitHub Actions | Figma | AWS | Vercel | React | Vite | Responsive Design

Technical Projects

Flashcards Project | [Github](#) | [Demo](#)

This Flashcard App is a web application that allows users to create, practice, and manage custom decks of flashcards organized via a responsive layout and a carousel view.

- I engineered a responsive [Flashcard App](#) that empowers users to create customized, color-coded learning decks with real-time JSON formatting validation.
- Powered by a JavaScript frontend and backed by a remote API database, this app ensures a user's study progress is permanently saved, seamlessly adapting from desktop screens down to mobile devices for learning on the go.
- This was an independent project, the first for my studies with TripleTen and took eight weeks to complete.

Project Mesh AI | [Github](#)

This project is a TypeScript-based AI application designed to enable persistent, real-time message handling and interaction logging across a structured, mesh-like network environment.

- Engineered a backend application, [Mesh-AI](#), using TypeScript and Express to eliminate data volatility in automated network environments.
- Attempting to solve communication tracking gaps by designing and implementing a persistent storage layer with MongoDB, and optimize the development lifecycle by configuring Postman API resource suites, ESLint code-quality guardrails, and secure environment variable workflows.
- This is an independent project, the second for my studies with TripleTen and took 10 weeks to complete.

Workspace Hub | [Github](#) | [Frontend Live Link](#)

WorkspaceHub is a full-stack MERN SaaS project and team management web application designed for organizing work within companies. It enables users to create and manage projects, track individual tasks with comment discussions, schedule resource bookings, and control administrative permissions based on user roles. It is built with TypeScript on both the client and server.

- Built a collapsible task comment section showing total comment counts, supporting instant top-of-list rendering for new posts and role-based edit/delete permissions for authors, owners, and admins.
- Added a task count indicator to project tiles on the Projects page and integrated a compact team member preview area on the dashboard to highlight roles.
- Implemented pre-submission booking validation checks along with user-facing error alerts when actions fail.
- This is an independent project, the third for my studies with TripleTen and took four weeks to complete.

Professional Experience

Junior Specialist, Center on Disability Studies, Honolulu, HI

08/2021 - current

- Coordinated grant-funded support programs and site operations supporting over 100 Native Hawaiian community college students, successfully building operational excellence and fostering a structured environment that enhanced student development and program compliance.
- Led end-to-end talent management initiatives—including drafting job specifications, managing recruitment pipelines, and conducting performance evaluations for three projects with a combined total of about 35 staff (faculty, administrative, graduate assistant/student, and casual employees).
- Facilitated comprehensive student support frameworks rooted in cultural values, directly cultivating potential and student success outcomes and program engagement.

Lesley Fukushima

sprite_lksln31@yahoo.com | [LinkedIn](#) | O'ahu, HI | Open to Relocation

HR Specialist, Center on Disability Studies, Honolulu, HI

01/2016 - 08/2021

- Spearheaded end-to-end talent acquisition and recruitment initiatives, to support a department with over 150 employees in faculty, administrative, graduate assistant/students, casual and temporary classifications based on multiple islands in Hawaii, in American Samoa and the Marshall Islands.
- Administered comprehensive performance evaluation frameworks and personnel workflows, fostering a supportive, compliant environment.

Payroll & HR Assistant, Oceanic Time Warner Cable, Mililani, HI

10/2005 - 12/2010 and 12/2013 - 12/2015

- Administered comprehensive leave-of-absence and compliance frameworks—including FMLA, HFLL, and Workers' Compensation.
- Executed rigorous high-volume payroll auditing and processing workflows, identifying discrepancies to guarantee data integrity and cross-departmental financial accuracy for a workforce of over 900 employees spread out across the State of Hawaii.
- Streamlined end-to-end HR support operations and personnel record-keeping, enhancing the efficiency of the employee lifecycle onboarding and tracking systems.

Education

AI Software Engineering Certificate, TripleTen

Expected Completion: 08/2026
